ABOUT ME

Computer Science Student & Full-Stack Engineer specializing in building scalable solutions from the ground up. Expert in architecting PostgreSQL databases via Supabase, developing back-ends with FastAPI, Java, and PHP, and crafting responsive React interfaces. Proven collaborator with a focus on AI integration, performance optimization, and translating complex logic into user-centric applications. Highly disciplined and self-motivated to solve high-stakes technical puzzles within fast-paced, growth-oriented teams.

EDUCATION

BSc (Hons) in Computer Science, <i>University Of Westminster, Informatics Institute of Technology</i>	2025 – Present Colombo 4, Sri Lanka
Foundation Certificate in Computer Science (Distinction), <i>Informatics Institute of Technology</i>	05/2024 – 12/2024 Colombo 6, Sri Lanka
G.C.E Ordinary Levels, <i>Lyceum International School Nugegoda</i>	2008 – 2022 Nugegoda, Sri Lanka

TECHNICAL SKILLS

Languages and Frameworks • <u>Frontend & Design</u>: React JS, React Hooks, Context API, Tailwind CSS, Responsive Design, Figma • <u>Backend & APIs</u>: Node.js, FastAPI, RESTful APIs, Authentication (JWT, OAuth) • <u>Languages</u>: JavaScript, TypeScript, Java, Python, HTML, CSS	Databases and Cloud infrastructure • <u>Databases</u>: PostgreSQL, MongoDB Atlas, SQLite, JSON-based Storage • <u>BaaS/Cloud</u>: Supabase, Firebase • <u>Architecture</u>: Relational Database Design, NoSQL, Real-time Data Sync
---	---

PROJECTS

AI-Powered Aphasia Therapy Robot - Software Lead, <i>Engineered the full-stack software for an AI Aphasia robot, bridging a React dashboard and FastAPI microservice with Supabase to execute real-time AI speech workflows.</i>	09/2025 – Present
<i>Key Technologies:</i> • Frontend: React JS, Tailwind CSS • Backend & Database: FastAPI, Supabase, PostgreSQL, Python • DevOps: CI/CD Pipelines, Netlify, Microservices, IoT Integration <i>Accomplishments:</i> • Bridged a Raspberry Pi robotic assistant to a web dashboard via FastAPI and Supabase real-time sync. • Built a ReactJS + Tailwind clinical portal with therapy configuration and automated CSV report generation. • Secured patient data with Supabase Auth, PostgreSQL RLS, and environment variable isolation.	

- Automated CI/CD via GitHub Actions and Netlify with email alerts on failed deployments.

PixelPage-Gamez, *A browser-based arcade hub built with React and Firebase, hosting multiple mini-games with real-time leaderboards and cross-device support.*

08/2025 – 09/2025

Key Technologies:

- React JS , Tailwind CSS, Firebase, Figma

Accomplishments:

- Built a React SPA housing multiple web games with a shared Firebase Firestore leaderboard and persistent player progress.
- Designed a responsive retro UI with Tailwind CSS, optimized for low-latency arcade-style interactions across devices.

Video-Photo Sharing app, *A high-performance, async REST API for media sharing, built with FastAPI, SQLite, and ImageKit.*

08/2025 – 01/2025

Key Technologies:

- Fast API, Imagekit.io, SQLite, SQLAlchem

Accomplishments:

- Built an async FastAPI backend to handle concurrent media uploads without blocking server operations.
- Designed the database schema with SQLAlchem
- Integrated ImageKit.io for cloud storage, with automatic file type detection to serve the right media format.

VOLUNTEERING EXPERIENCE

- **Cutting Edge 25'**, *Program and Logistics Volunteer*
- **IEEE Robotics and Automation Society**, *Vertex 25', Delegate Handling Volunteer*
- **Rotract Club of IIT**, *IGF 24', Head referee for gaming competitions*

EXTRA CURRICULAR ACTIVITIES

- IIT Football
- Karate (LISN Black Belt)
- Swimming (Premadas Swimming Club)
